Travel Assistance

If an incident occurs while you are away from your home country: Treatment **MUST** begin in the foreign country for you to be eligible to submit claims once back in their home country. Make sure to ask for a copy of your medical records and receipts before you leave the hospital. This will be required when turning in your claim information. It should be official documentation, showing the doctor or facility's address information. Ask ISA or your agent for a claim form upon returning from your travels. You have 60 days from the date of initial service to file a claim.

For more information on coverage or for a quote, please visit: www.InsuranceForTrips.com/FTI
